

Study about a degradation forecasting method for choice of appropriate repairing methods of a cultural asset

Noguchi lab M2
Inomoto Kai(井ノ本快)

- Background
 - RC buildings designated as cultural properties increased
 - Surveys and diagnoses involve destructive testing
 - It is necessary to conduct a enough survey
- Purpose of the research
 - Clarify the effect of various repairs on the transition probability of Markov chains
 - Development of support tools for predicting future changes in order to take appropriate measures in cultural properties
